

Update Instructions (V2.9 to InterCafe 2004)

If you want to make an Update from V2.9 to InterCafe 2004 please follow these instructions:

1 Server

1. Save the files `Daten.mdb` and `Jounal.mdb` from the program folder.
2. Uninstall Version 2.9.
3. Install InterCafe 2004.
4. Copy the files `Daten.mdb` and `Journal.mdb` back into the InterCafe program folder (standard `C:\program files\INTERCAFE`).
5. Delete all Clients in the Computer Overview.
6. Exit InterCafe 2004 Server.

2 Client

1. Uninstall the Client V2.9 Software.
2. Install the InterCafe 2004 Client Software.

After the installation please configurate the Clients. We recommend to install the Client as System Service if using Windows XP or Windows 2000. You can make these settings in the Client Configuration at each Client. Don't forget to set the Server Name (Windows Computer Name of the Server) as well as a password for the Client Configuration.

To add the Clients again to the Computer Overview click on → *Settings* → *Client Configuration* → *Search for Clients* at the Server.

InterCafe 2004
